

The Franklin Conservation District administers the Irrigation Water Management (IWM) cost-share program offered by the Bonneville Power Administration (BPA) thru the Franklin Public Utilities District (FPUD). All fields must be within the FPUD service area to be eligible. These signups are taken in the spring for the upcoming irrigation season. New participants must register by filling out a field information sheet for each field, a plan sheet, cost-share application and agreement form. Those operators who are currently participating need to update these forms annually.
